## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3, and 6-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ross et al. in view of GB 2286232.

Re claims 1-3 and 6-10, Ross et al. teach a vehicle comprising at least two rear axles comprising at least one wheel at each of the respective ends of the axle and means for selectively applying parking brake forces to wheels at the rear axles of the vehicle. Ross et al. do not teach applying only diagonally disposed parking brake forces to the wheels. GB 2286232 teaches applying only diagonally disposed parking brake forces to the wheels. (See Abstract) It would have been obvious to one of ordinary skill in the art to have applied the parking brake forces diagonally as taught by GB 2286232 to provide security for the vehicle while reducing the number of parts necessary.

### ***Allowable Subject Matter***

3. Claim 11 is allowed.

### ***Response to Arguments***

4. Applicant's arguments with respect to claims 1-9 have been considered but are moot in view of the new ground(s) of rejection.
